Education

National Technical University, Lutsk, Ukraine   2022-Present

BACHELOR DEGREE IN COMPUTER ENGINEERING

Scientifically based education that includes theory, specialist knowledge and practical knowledge of computer science. The university is providing the ability to apply computer engineering methods and tools, to independently participate in researches and further development, and to apply computer science methods, process models, tools and systems to solve practice-related problems.

Linguistic Gymnasia #18, Lutsk, Ukraine   2011-2022

EDUCATION WITH THE MAIN ACCENT MADE ON STUDYING LANGUAGES, INCLUDING UKRAINIAN, ENGLISH AND GERMAN

Who am I?

I`m Ukrainian student, who is now dislocated in Poland. I am looking for a job where I can improve my skills and meet new people. I like combining the worlds of logic and creativity and developing eye-catching and user-friendly web-sites.

I also enjoy learning something new and making myself even better every day. I like this direction of work because I feel free in my abilities. Besides I can create various interesting animations and combine different languages of programming in one project.
